

SIVA PRASATH L

Cyber Security Student | VAPT | Bug Bounty Hunter

Manaparai, Tiruchirappalli, Tamil Nadu, India | +91 8667845880

Email: sivaprasath157@gmail.com | LinkedIn: [LinkedIn.com/in/siva-prasath-l](https://www.linkedin.com/in/siva-prasath-l) | GitHub: github.com/sivaprasath157 | Portfolio: sivaprasathl.com

PROFESSIONAL SUMMARY

Cybersecurity Engineering student with hands-on experience in vulnerability assessment, penetration testing, and security automation using Kali Linux, Metasploit, Burp Suite, and Python. Built and deployed multiple security-focused projects including an AI-driven cybercrime investigation platform and a voice-controlled firewall automation system. Actively developing skills in ethical hacking and bug bounty hunting, with a strong foundation in networking, cryptography, and Linux-based security tools.

EDUCATION

B.E. Computer Science & Engineering (Cyber Security)	2024 - 2028 8.1
Sri Shakthi Institute of Engineering and Technology, Coimbatore, Tamil Nadu	
Higher Secondary Education (Class XII)	2023 79.6%
Lakshmi Matric Higher Secondary School, Trichy, Tamil Nadu	
Secondary Education (Class X)	2021 78.8%
Lakshmi Matric Higher Secondary School, Trichy, Tamil Nadu	

TECHNICAL SKILLS & TOOLS

Languages: Python, HTML/CSS, SQL

Databases: MongoDB, PostgreSQL

Security Tools: Kali Linux, Metasploit, Burp Suite, Wireshark, Nmap, John the Ripper, Hydra

CORE COMPETENCIES

- | | | | |
|-------------------|----------------------------|-----------------------|--------------------|
| • Ethical Hacking | • Networking | • Penetration Testing | • Python Scripting |
| • Cryptography | • Vulnerability Assessment | • Linux (OS) | • Flask |

KEY PROJECTS

NEUROVEIL – AI Powered Cyber Crime Investigation Platform [GitHub](#)

- Developed an AI-powered cybercrime investigation platform capable of analyzing 500+ simulated cybercrime complaints and generating actionable investigation leads for fraud cases.
- Built a graph-based evidence correlation engine that linked accounts, devices, phone numbers, and transaction records to visualize fraud networks across 1,000+ interconnected entities.
- Designed automated investigation workflows that generated structured case reports and recovery recommendations, reducing manual documentation effort through investigator-assisted automation.

Tech Stack: Python, Flask, FastAPI, Scikit-Learn, Pandas, NumPy, PostgreSQL, MongoDB, NetworkX, OpenCV, Tesseract OCR.

Voice-Triggered Firewall Control [GitHub](#)

- Designed and implemented a voice-controlled firewall automation prototype supporting 15+ security policy commands for Linux-based systems
- Developed a multithreaded architecture capable of processing speech recognition, validation, and firewall execution simultaneously.
- Integrated NLP-driven command interpretation with Linux firewall controls and successfully validated the system across 100+ functional test cases.

Tech Stack: HTML, CSS, Python.

Password Strength Analyzer [GitHub](#)

- Developed a responsive web-based password strength analyzer that evaluated password security in real time (<200 ms) and assessed 500+ common password patterns using rule-based analysis.
- Designed an intuitive UI/UX that provided personalized security recommendations, enabling users to generate stronger passwords while reducing weak-password selection during testing.

Tech Stack: HTML, CSS, Python.

CERTIFICATIONS & JOB SIMULATIONS

Certifications

- IBM – Computer Network and Network Security [Link](#)
- Cisco Networking Academy – Ethical Hacking [Link](#)

Job Simulations

- Tata – Cybersecurity Analyst Job Simulation [Link](#)
- Deloitte – Cybersecurity Job Simulation [Link](#)

LANGUAGES

- English (Read, Write, Speak, Listen)
- Tamil (Read, Write, Speak, Listen)
- Telugu (Speak, Listen)
